OPERATION TOASTY TOES

YARN COLOR GUIDE

SLIPPERS can be done in any color or color combinations. Please try to stay away from totally light colored pairs. If you have a light color yarn pair it with a dark color for a tweed effect. The toe and cuff can be done in one color with the body in another.

We use for single stand items medium to dark sage green; medium tan, gray and black for land forces. This committee through research using a swatch of fabric of the new combat uniform found the following yarns suitable.

Coats & Clark TLC Heathers #2445, Smoke Green
Bernat's camouflage line Outback #10481, Mash #10482 and Desert Sand #10486. We send these colors to Afghanistan.

For the Navy it's all black. The watch cap is the classic black cap with a cuff, see pattern for info. This committee is constantly looking for yarn to best suit the our Armed Forces color change in their uniforms.
